DANIEL MELO

Cloud Engineer · DevOps · SRE

dreimao4@gmail.com +55 91 98880-3908 linkedin.com/in/danielaugustormelo github.com/DanielMelo1 Brazil · Remote · UTC-3

PROFESSIONAL SUMMARY

Cloud Engineer specialized in AWS infrastructure, Kubernetes orchestration, and DevSecOps pipelines. Developed production-grade platforms including a multi-tenant observability system with SLA-aware auto-scaling, and an end-to-end DevSecOps pipeline integrating SAST, DAST, and IaC security. AWS Solutions Architect Professional (SAP-C02) certified. English for technical communication with national and international teams.

CERTIFICATIONS

AWS Solutions Architect Professional (SAP-C02) — AWS (March 2026)

AWS Certified Cloud Practitioner — AWS (2025)

Cisco Networking Academy — Networking (2024)

Cisco Networking Academy — Cybersecurity (2024)

TECHNICAL SKILLS

Cloud	AWS EKS · EC2 · S3 · Lambda · RDS · Aurora · DynamoDB · DocumentDB · CloudFront · VPC · SSM · SNS · SQS · Route 53
Kubernetes	EKS · HPA · IRSA · NetworkPolicy · ResourceQuota · LimitRange · Helm · multi-tenant isolation
IaC	Terraform (modular) · AWS CloudFormation · AWS SAM
CI/CD	GitHub Actions (OIDC) · AWS CodePipeline · CodeBuild · CodeDeploy · Jenkins
DevSecOps	Trivy · OWASP ZAP · SonarQube · SSM SecureString · IAM least-privilege · shift-left security
Observability	Zabbix · Prometheus · Grafana · CloudWatch · Alertmanager
Containers	Docker · containerd · GHCR
Languages	Python · Bash · HCL
OS & Network	Linux (Ubuntu, Amazon Linux) · Windows Server · DNS · VPN

EXPERIENCE

Cloud & DevOps Engineer · Independent Projects · Start na Cloud Mentorship Program

Jun 2024 – Dec 2025 | Remote, Brazil

- Designed and deployed a multi-tenant Kubernetes observability platform on AWS EKS for MSPs, with SLA-aware auto-scaling (99% / 99.5% / 99.99% SLA tiers) and namespace-level client isolation using ResourceQuota, LimitRange, and NetworkPolicy.
- Built an end-to-end DevSecOps pipeline integrating SAST (Trivy + SonarQube), DAST (OWASP ZAP), and IaC security scanning — with zero hardcoded credentials via SSM Parameter Store.
- Implemented GitHub Actions CI/CD with OIDC authentication (eliminating static credentials), achieving 56-second zero-downtime deployments.
- Provisioned 15+ AWS resources per project using modular Terraform — VPC, EKS, IAM, Security Groups, ALB, S3, RDS, Route 53.
- Authored 13 technical articles on Medium documenting architecture decisions, security practices, and AWS implementations.

Digital Transformation Advisor · Câmara Municipal de Cametá

Jan 2025 – Nov 2025 | Cametá, Pará, Brazil

- Designed and delivered a full-stack document management web application to modernize parliamentary workflows for the municipal legislature.
- Provisioned complete AWS infrastructure via Terraform: EC2, S3, DynamoDB, CloudFront, VPC, IAM, Security Groups.
- Implemented automated CI/CD pipeline with GitHub Actions for continuous deployment.
- Stack: Terraform · AWS (EC2, S3, DynamoDB, CloudFront, VPC) · GitHub Actions · Node.js.

Systems Analyst · Secretaria Municipal de Educação (SEMED)

Jul 2022 – Dec 2024 | Cametá, Pará, Brazil

- Managed and maintained municipal educational system — responsible for deployment, technical support, and system monitoring.
- Trained 100+ users (teachers, principals, coordinators), reducing support tickets by 65% through structured onboarding.
- Maintained 99% system availability through proactive monitoring and incident response.

Technical Support Specialist · Talk N' Fix Wireless

Feb 2017 – Oct 2019 | United States

- Provided technical support for devices and networks in an international environment — English, Spanish, and Portuguese.
- Diagnosed and resolved hardware and network incidents in a high-volume US retail environment.
- Delivered multilingual customer service across diverse client base.

Technical Lead & Business Owner · Top Cell

2014 – 2022 | Cametá, Pará, Brazil

- Led technical operations for device repair and support business — team coordination, SLA management, and technical consulting.
- Managed inventory, client relationships, and technical staff across 8 years of operation.

KEY PROJECTS

▸ MSP Observability Platform *github.com/DanielMelo1/msp-observability-platform*

Multi-tenant Zabbix monitoring on EKS with SLA-aware auto-scaling · Webhook-driven kubectl scaling · 60% cost reduction via off-hours scheduling

▸ DevSecOps Pipeline *github.com/DanielMelo1/repo-dev-secops-main*

SAST (Trivy + SonarQube) + DAST (OWASP ZAP) + IaC Security · SSM SecureString · Timestamped audit reports in S3

▸ Kubernetes Production Platform *github.com/DanielMelo1/k8s-production-platform*

EKS + 11-microservice e-commerce (gRPC, multi-language) · Multi-AZ · HPA · Prometheus + Grafana · Full Terraform IaC

▸ Serverless Price Monitor *github.com/DanielMelo1/MonitorPrecosServerless*

Lambda (Python 3.12) + Step Functions + DynamoDB + API Gateway · AWS SAM + Terraform CI/CD · Single Responsibility architecture

EDUCATION

B.S. in Software Engineering — Estácio de Sá *2021 – 2024*

B.S. in Education (Pedagogy) — Universidade Federal de Lavras *2018 – 2022*
